PRO 9470 – headset, base (9470-66-904-105)

WHICH HEADSET IS RIGHT FOR YOU?

Four steps is all it takes to simplify the purchase decision and discover the best combination of headset options for your business. Although we have an exceptionally wide range of solutions, please note that not all combinations are possible.

1. WIRELESS OR CORDED?

Wireless headset solutions are ideal if you:

- Want the freedom to work at your desk and move around
- Want a sleek, attractive headset design without cords

Corded headset solutions are suitable if you:

- Work only at your desk
- Want the best possible inbound sound quality in one or both ears
- Want Hi-Fi stereo quality

2. WORKING IN NORMAL OR EXTRA LOUD ENVIRONMENT?

Three different business-grade microphones are available to ensure your voice is transmitted clearly, no matter which environment you work in.

Omnidirectional microphone

- Ideal for use in most normal office environments

Noise-canceling microphone

- Great for use in noisier, open office environments

Ultra noise-canceling microphone

- Ideal for use in very noisy environments where back ground noise can interfere with your calls
- And if colleagues are seated close to each other

3. WANT SOUND IN ONE OR BOTH EARS?

Do you want to listen to sound through one ear or two? Do you want stereo sound, or is mono sufficient?

Sound in one ear – mono

- Ideal if you like to be aware of what's going on around you

Sound in both ears – duo

- Ideal if you only want to hear the caller's voice and want to close out surrounding noise

4. WHAT'S YOUR PREFERRED WEARING STYLE?

Select the headset solution with the wearing style(s) that's right for you. Many GN Netcom headset solutions even offer interchangeable wearing styles, letting you switch styles at any time.

Headband

- Fully adjustable, over-the-head wearing solution

Earhook

- Flexible earhook that gently holds the receiver to your ear

Neckband

- Wearing style worn behind-the-neck

Interchangeable: 2-in-1

- The 2-in-1 offers you two wearing styles in one headset: headband and earhook

Interchangeable: 3-in-1

- The 3-in-1 offers you 3 of the following wearing styles: headband, neckband, or earhook

Interchangeable: 4-in-1

- The 4-in-1 offers you 4 of the following wearing styles: headband, neckband, earhook, earloop

EIGHT GOOD REASONS TO INVEST IN A JABRA HEADSET SOLUTION.

PRODUCTIVITY

Experience the freedom and increased efficiency from hands-free communication. With a headset, you can continue working productively, while talking with both hands free. Complete multiple tasks quickly and easily, improving the speed of daily work. To learn how quickly a Jabra headset pays for itself visit www.jabra.com/roi

DURABILITY

Choosing a high-quality Jabra headset gives you full reliability. It will not only save you in replacement costs, but you will also be spared downtime and repair hassles.

COMFORT

Headsets with carefully adjusted acoustics, light-weight structures and ergonomic design plus a selection of wearing styles to match the needs of any user makes it easier and more comfortable to make and take calls at work.

SOUND CLARITY

Experience consistently superior call sound clarity with Jabra headsets that incorporate the finest in acoustic technology. All headsets feature PeakStop™ technology. Combined with noise-canceling microphones this ensures that you hear and are heard clearly.

MOBILITY AND RANGE

Enjoy freedom of movement with our wireless headsets offering an unparalleled office range of up to 450 feet.

TALK TIME

All Jabra wireless headsets provide day-long talk time with the headset charging in the base between calls.

SECURITY - BUILT IN DIGITAL ENCRYPTION"

All Jabra wireless office headsets digitally encrypt the signal between headset and base. This guarantees conversation confidentiality where you can talk freely, confident that the only people listening in are the ones you're talking to.

CONFERENCE CALLS

The Jabra GN9350e, GN9125 & GN9470 offer the optimal solution for conference calling. Up to four people can take part in a wireless conference call by docking their headsets in the base of the caller, and continue to talk with clarity from anywhere in the office environment.

WIRELESS HEADSETS

OUTSTANDING CLARITY. EXCEPTIONAL WIRELESS RANGE.

JABRA GN9125 FLEX

- 300 feet of unbeatable wireless freedom
- 1.9 GHz Technology & DECT™ 6.0 Security
- Up to 12 hours of talk time
- Interchangeable earhook and headband wearing style for choice of all-day comfort
- Up to 4 units conferencing capability
- Reduced background noise (noise-canceling microphone) for crystal-clear calls
- Supports Jabra RHL, EHS, and HHC remote call control options

Available model:
GN9125 Flex (9125-28-15)

TWICE THE CLARITY. EXCEPTIONAL WIRELESS RANGE.

JABRA GN9125 DUO

- Noise-canceling microphone for reduced background noise and crystal-clear calls
- Multi-unit conferencing capability

- Bluetooth connection to mobile phone
- Enables connectivity from telephony to PC

Available models:
LINK 280-280-09

PC AUDIO AND UC (VOIP) SOLUTIONS

UNIFIED COMMUNICATIONS

Unified Communications (UC) describes a situation in which technologies such as voice, email, and instant messaging are integrated and presented to the user via a single intuitive user interface. The idea is to enhance productivity and facilitate cooperation by unifying and streamlining the way we communicate.

One of the things that makes UC so attractive is that it facilitates collaboration. The combination of a common interface and greatly improved sound quality increases the sense of proximity, regardless of location.

JABRA PC SUITE

Jabra PC Suite is a free PC software that enables remote call control with Jabra headsets and the latest generation of IP softphones.

For wireless headsets, this means that users can answer and end VoIP calls up to 450 feet away from their desk. The seamless integration of headset and softphone allows users to benefit from enhanced mobility and the ability to multitask while on a call. The wireless freedom improves worker productivity and ergonomics throughout the day
